SUMMARY

Full-Stack Developer with 3+ years of experience building production web applications, payment systems, and AI-powered platforms. Strong focus on Python (FastAPI, Django), Next.js, TypeScript, REST APIs, PostgreSQL, Docker, and CI/CD workflows. Proven track record delivering measurable business outcomes — from e-commerce platforms serving real customers to secure transaction systems processing 1,000+ monthly transactions at 99.9% uptime. Seeking a full-time role on a product team where ownership, clean architecture, and long-term impact matter.

SKILLS AND KNOWLEDGE

- **Full-Stack Development:** Python, FastAPI, Django, Next.js, React, TypeScript, JavaScript, GraphQL, REST APIs, HTML5, CSS3, Tailwind CSS
- **Databases & Infrastructure:** PostgreSQL, SQL Server, Docker, Linux, Git, CI/CD pipelines
- **AI & Data:** Machine Learning, Deep Learning, NLP, OpenCV, Keras, Data Mining
- **Engineering Practices:** System design, JWT authentication, API security, code reviews, agile workflows
- **Soft Skills:** Problem-solving, team collaboration, ownership, analytical thinking, adaptability

EXPERIENCE

Oct 2024 – Jan 2026
Lead Full-Stack Developer

AI Ankabot — Full-time
Syria - Remote

Led end-to-end development of a secure payment and transaction platform used in production.

- **Architected FastAPI backend** with **JWT authentication**, **encryption**, and **multi-layer security protocols** for financial data protection
- **Built Next.js** web interface and **PyQt desktop** client sharing the same transaction core
- **Processed 1,000+ transactions** per month with 99.9% system availability
- Designed **database schemas** and API contracts for reliable, auditable payment flows

Jun 2023 – Aug 2024
Frontend Developer

LIT-Co - Full-time
Lebanon - Hybrid / On-site

Drove web development for the Plaze e-commerce platform and company WordPress ecosystem.

- **Led development** of the **Plaze e-commerce** storefront (**Next.js + GraphQL**), increasing conversion rate by 15% — live at plaze-shop.de
- Customized **10+ WordPress themes** and **plugins**, boosting user interaction by 20%
- Led a full website redesign that improved **mobile responsiveness** and increased mobile traffic by 40%

April 2023 – Jun 2023
Frontend Developer Intern

LIT-Co - Internship
Lebanon - On-site / Hybrid

- Built and refined **React/Next.js** UI components in a production team environment
- Participated in **code reviews**, **stand-ups**, and incremental feature delivery
- Progressed to **full Web Developer** role based on performance (Jun 2023)

2022 – Present
Full-Stack Developer

Independent / Freelance
Remote

Selected client and product engagements - end-to-end from architecture to deployment.

- **AI Autism Early-Detection Platform (2025):** Next.js + FastAPI with OpenCV face detection, Keras emotion models, and XAI questionnaire module for behavioral assessment
- **Custom Marketing Interface (2023):** React + Storybook enabling 50+ clients to personalize campaigns efficiently
- **Blockchain Voting System (2024):** Secure platform processing 10,000+ votes with zero reported integrity issues

PROJECTS

Blockchain Voting System

Secure, transparent voting platform handling 10,000+ votes with zero reported integrity issues.

- Designed **smart-contract** architecture ensuring auditability and tamper resistance
- Built **full-stack web** interface for voter registration and real-time result tracking

Autism Early-Detection AI Platform

Full-stack AI application combining computer vision and explainable AI for early behavioral assessment.

- Integrated **OpenCV** for facial recognition and **Keras** models for emotion analysis
- Built **XAI-based** questionnaire module for comprehensive multi-modal evaluation

EDUCATION

2017 – 2023

Bachelor of Science in Information Technology (Artificial Intelligence Engineering)
Tishreen University, Syria | GPA: 71.43%

Graduation Projects:

- **NLP Emotion Classification:** AI application classifying emotions from text using NLP techniques
- **Self-Driving Car Simulation:** Autonomous vehicle behavior simulation using Unity and genetic algorithms
- **Music Classification System:** Data-mining project classifying music based on listening preferences

Degree Status: Officially recognized foreign qualification in Germany (**ZAB certificate available**)

AWARDS & CERTIFICATIONS

- 5th Place — Syrian Cyber Security CTF Competition (2021)
- Participant — ICPC Programming Contest (2020)
- Meta: Introduction to Back-End Development (Coursera)
- Meta: Introduction to Front-End Development (Coursera)
- DeepLearning.AI: Neural Networks and Deep Learning (Coursera)
- Meta: Programming in Python (Coursera)

LANGUAGES

- English: B2/C1 — Professional working proficiency (fluent in written communication)
- German: A2 — Basic (actively preparing for B1 certification)
- Arabic: Native
